

REMOTE CONTROL ENGINE STARTING DEVICE FOR VEHICLE

5

ABSTRACT OF THE DISCLOSURE

10 A remote control engine starting device having an immobilizer and a remote engine starter and equipped with a remote engine starting function for starting an engine when an engine start command is given from a remote location, wherein the immobilizer comprises an interrogating signal outputting section which outputs an interrogating signal when a signal related to engine starting is received, and an engine start permitting section which gives engine start permission when a remote engine starter code that the remote engine starter outputs in response to the interrogating signal matches a remote engine starter verifying code preregistered in the immobilizer, and the remote engine starter comprises an engine start signal outputting section which outputs a signal related to engine starting, for example, an IG key insertion signal, an IG ON signal, etc., and a code outputting section which, in response to the
25 interrogating signal, outputs the remote engine starter code preregistered in the remote engine starter.
